Packer Maxx 6' HD Cultipacker Pro

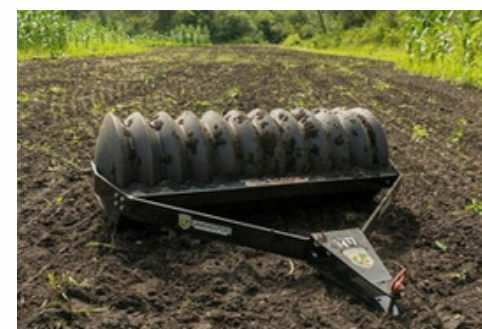

\$1499.99

Same great heavy duty design with some enhancements to the grove depth and spacing. With the wider stance, the grove depths are kept shallower to allow for more soil contact across the entire width of the drum making for better compaction and seed to soil contact. The 6ft width covers all current production quads and side x sides. (Pictured with optional flip over wheel kit.) Heavy duty Roto Molded Polyethylene drum stands up to rough terrain and rocky conditions. Heavy Duty 3/8" steel frame. Cleaner bar helps keep the Packer Maxx drum free of moist soil build up. 135 pounds empty. 460 pounds filled with water.

Packer Maxx 4' HD Cultipacker

\$949.99

Tractor/ATV/UTV drawn 4 foot HD 1/4" thick Roto Molded Polyethylene cultipacker. Durable, Heavy duty construction will allow the Packer Maxx drum to withstand all types of terrain...rocky, to gravel to sand. Heavy Duty 3/8" steel frame with scraper bar. Weighs 400 pounds with water and 600 with sand. Sand is not recommended for use with the wheel kit.

TRAIL CAMERAS

Cuddeback Tracks IR

Cuddeback introduces the Tracks line of LTE cameras with state-of-the-art LTE technology. Tracks is a full featured LTE trail camera with fast trigger speed and exceptional image quality. Tracks and its companion mobile app are 100% USA designed by Cuddeback to assure your images and privacy are protected.

Note: This is not a CuddeLink camera. Each Tracks camera requires a separate data plan.

\$149.99

STEALTH CAM®

Stealth Cam Revolver 360 Cellular Trail Camera

Stealth Cam's all-new Revolver™ 360-Degree Cellular Trail Camera delivers the equivalent of six cameras worth of coverage in a single device — capturing 4MP/8MP/16MP/36MP photos and 1080 HD video with audio via a revolutionary, 360-degree cellular model that covers six zones to deliver a complete panorama of its surroundings. This means users get a full 360 degrees of visibility, day and night, to ensure they never miss a thing — even deer passing behind where the lens is positioned.

\$149.99

Cuddeback Solar Power Bank - Model PW - 3600

Features poly crystalline solar panel that charges battery in the sun. In the event the solar battery is depleted the camera will continue to operate from the camera's internal batteries. Once the solar battery is sufficiently charged, it will resume powering the camera. Compatible with all CuddeLink and Tracks cameras. Solar panel with built-in NiMH battery that performs in sub-freezing temperatures and extends camera runtime indefinitely. Includes: solar panel with built-in battery, connecting cable, Genius Tilt mount, mounting strap, instructions

\$59.99

Cuddeback Super Solar Power Bank - Model PW - 003

\$99.99

Cuddeback Power Bank - Model PW - 001

Holds additional 6 D batteries that more than double the runtime over camera batteries. Compatible with all CuddeLink and Tracks cameras.

\$20.00

Cuddeback Hardcore Power Plant

The Powerplant runs any trail camera, with no batteries inside and no matter the voltage. Mounts next to your camera, just plug it in, select the voltage, and go! Lasts 2+ times longer (per charge) than batteries and is good for over 800 charges.

\$139.99

Cuddeback Cuddelink Cell Home

CuddeLink revolutionized cellular LTE trail cameras by significantly reducing the cost of LTE service. With traditional LTE trail cameras every camera requires a data plan such that multiple cameras can lead to excessive cost. With CuddeLink you can have up to 24 cameras on 1 cell plan.

CuddeLink Cell Home is the heart of the CuddeLink system, receiving images from CuddeLink cameras and sending them to you via LTE. Cell Home does not feature a camera, its purpose is to collect images from CuddeLink cameras and send them to you.

\$130

Cuddeback Cuddelink Cell Version

CuddeLink Cell utilizes CuddeLink technology to allow up to 16 cameras to share one \$10 per month cell plan. So instead of paying for multiple cell plans that can add up to \$50, or \$75, or over \$100 per month, CuddeLink Cell allows you to have up to 16 CuddeLink cameras on one \$10 per month plan (750 images per month). Unlimited image plan is only \$30 per month.

Note that CuddeLink Cell camera operation requires an active Cuddeback Cell Data Plan. Each cell camera needs their own data plan to operate.

FEATURES:

- Model: G-5109
- Megapixels: 20
- Trigger Speed: 1/4 second
- LEDs: 56 850nm
- Flash Type: Low Glow IR
- Flash Range: 100 feet
- Battery Type: 4 x D
- Cellular Service: Verizon 4G LTE

\$199.99

Cuddeback Cuddelink Starter Kit IR

CuddeLink 2+1 Starter Kit - Model KT-002

Each Contains a LLC-H Home Unit and 2 remotes. LL-2A

\$450

To order or request more information email jake@kanatiland.com

Cuddeback Cuddelink L Series IR

CuddeLink L-Series cameras capture images and send them to CuddeLink Home. Features a high-definition image sensor, passive animal detector with sensitivity adjustments, built in user interface for in-field setup, and much more.

CuddeLink Black Flash uses no-glow LEDs for totally invisible illumination.

If you prefer not to use LTE connectivity, CuddeLink cameras can also be used in a non-LTE CuddeLink network.

FEATURES

- CuddeLink IR uses 850nm IR LEDs for longest night illumination with excellent image clarity and illumination range exceeding 100 feet.
- High-definition image sensor optimizes image clarity for LTE delivery and phone viewing.
- 3rd generation animal detector with 7 sensitivity settings.
- Camera Delays from 5 seconds to 1 hour.
- Patented Auto Camera Delay dynamically adjusts delay based upon animal activity.
- Two time-lapse modes - patented Prime Time operates only in mornings and evenings, and conventional time lapse.
- 1/4 second trigger speed means more deer and fewer blanks.
- Patented CuddeLink network technology.
- High gain CuddeLink antenna for improved performance.
- Built in user interface for setup at the camera. When connected to a CuddeLink Cell system settings can be configured with mobile app or web browser.
- Date and time set automatically from the CuddeLink Home.

Additional Features

- Compatible with all series CuddeLink cameras - J, G, K & L series.
- Compatible with all current Cuddeback power accessories and Genius mounts.
- Requires 4D batteries (not included).
- Requires SD card up to 256GB in size (not included).
- Designed by Cuddeback in the USA.
- 5.2.1 Warranty includes 1 year standard warranty, 2 years with online registration, 5 year reduced cost replacement.

Kanati

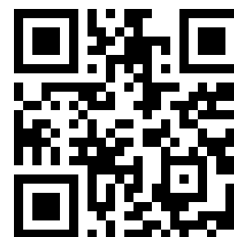

**YOUR ONE-STOP-SHOP FOR CONSERVATION
INNOVATION.**

About Us

No matter the type of service Kanati offers, we deliver value with a clear purpose and the ultimate goal of sparking sustainable practices to protect the natural rarity of our world. Founded in 2019 and based in Avon, MN, Kanati is equipped with a highly mobile, adaptable, and creative team of conservation experts. We offer direct, personal communication as we guide landowners and farmers through the full experience of planning, designing, and application to ensure their multi-use land visions come to life.

We build ourselves on extremely responsive and transparent service, that helps landowners obtain their conservation and wildlife management goals while rendering them with means of implementation.
