Kanati's Final Feast

Net Weight: 4 lb. bag | 1/2 acre
8 lbs/acre drilled or broadcast

MIXTURE: *New Zealand Brassicas, Forage Collards, Forage Turnips, Forage Radish, Rape and Rutabaga*

A highly digestible protein mix that will provide maximum tonnage for cold-weather fall food plots and will provide maximum attraction after first frost and throughout winter. This blend can be planted as a stand-alone, mixed with Autumn Greens and/or broadcast or drilled into beans to offer wildlife a rich and diverse food source.

PLANTING DATES FOR UPPER MIDWEST:

July 15-August 15 (45-60 days before first frost average date)

\$39.99

Kanati's Keep Them Keep Them Clover & Alfalfa

Net Weight: 5 lb. bag | 1/2 acre
10 lbs/acre drilled or broadcast

MIXTURE: *Select Ladino, Alsike, Medium Red and White Dutch Clover, Balansa Clover, Berseem Clover, Crimson Clover, Falcata Alfalfa and Forage Chicory*

A premium mix of all season clovers, alfalfa and chicory. This food plot really thrives by being an all-season food source that will provide perennial forage. It is the combination of high nutrition and robust regrowth both deer and turkeys cannot resist.

PLANTING DATES FOR UPPER MIDWEST:

April 1-June 15th, July 15-Sept 1

\$44.99

Sales tax not include in listed prices.

Kanati's Regen Mix

Net Weight: 15 lb. bag | 1 acre
15 lbs/acre drilled or broadcast

MIXTURE: *Balsana Clover, Berseem Clover, Buckwheat, & Crimson Clover.*

This mix of annual clovers provides nutritional summer forage that provides deer with excellent nutrition to enhance antler growth, body size, and overall health of the deer herd. The mix also adds nitrogen to your soil, improves water absorption and serving as weed suppression.

PLANTING DATES FOR UPPER MIDWEST:

July 15-August 15 (45-60 days before first frost average date)

\$64.99

Final Flush

Net Weight: 50 lb. bag | 2.5 acres
20 lbs/acre drilled or broadcast

MIXTURE: *Red Milo, White Milo Oats, Sunflower, White Proso Millet, Buckwheat, Forage Sorghum, Mustard, Flax, Phacelia, Crimson Clover, & Sun Hemp.*

The combination of hearty grains and perennial broadleaves is an intelligent blend that provides a diverse, yearlong food source necessary for chick and adult pheasant survival. It also provides excellent winter habitat and hunting cover.

PLANTING DATES FOR UPPER MIDWEST:

April 1-June 15th

July 15-Sept 1

\$85.00

Kanati's Autumn Greens

Net Weight: 50 lb. bag | 1/2 acre
100 lbs/acre drilled or broadcast

MIXTURE: *Winter triticale, buck forage oats, hard red winter wheat and rye grain.*

This mix was designed as a high producing, high protein food source in mind. While promoting deer health, Kanati's Autumn Greens is the mix you need for small hunting plots late in the season.

PLANTING DATES:

Early August to Mid-September

\$49.99

Kanati's Confidence Screen

Net Weight: 5 lb. bag | 1/3 acre
15 lbs/acre drilled or broadcast

MIXTURE: *Pearl Millet, Egyptian Wheat and Specialty Hybrid Forage Sorghum*

This blend grows tall and will give you a visual block bordering food plots and travel routes. The mix is made up of different height plants for maximum durability against wind and snow with some plant's height reaching 8'-12' tall within 70-100 days. A win win: deer have privacy and feel more comfortable, and we are able to enter and exit stand sights undetected.

PLANTING DATES FOR UPPER MIDWEST:

Last week of May – Early June

\$34.99
